Memorandum

To: City Commissioners
    Jeff Pederson, City Manager
From: Paul Lewis, Parks & Recreation Director
Date: January 30, 2007
Subject: Cemetery Rules, Regulations, and Fees

Over the last few years, staff has experienced a growing problem with unauthorized and non-conforming decorations and embellishments on grave sites at Maple Grove Cemetery. The problems include using a variety of personal items to decorate graves; placing wrought iron plant hangers and other decorative fixtures around grave sites; and permanently affixing decorative items in the cemetery.

Although the present regulations contain language defining grave markings and restricting certain activities, there is enough ambiguity to the definitions that make enforcement difficult and interfere with staff’s ability to maintain the grounds. This has lead to situations creating conflict between staff and the public.

For instance, under the present regulations, certain types of temporary decorations are allowed as long as they are not “unsightly by reason of neglect or age.” This can be a very subjective determination and results in what is supposed to be a temporary thing being left for extended periods of time.

For that reason, staff suggests revisions to the present regulations to add definition and clarity and correct some ongoing issues. Suggested changes include the following:

- **Temporary Decorations** – Establish five defined periods throughout the year when temporary decorations can be left on a grave site. Temporary decorations would be allowed at Memorial Day, Veteran’s Day, through the winter holiday season, birth date, and at the anniversary of the date of passing. Flowers would always be allowed as long as they were maintained in approved receptacles. All other temporary decorations will be removed outside of those time periods.

With these guidelines, individuals will have defined opportunities to decorate grave spaces with a variety of items of personal interest. The rest of the year, cemetery staff will remove temporary decorations to reduce clutter and facilitate maintenance operations.
• **Monument Foundations** – Based on new methods utilized by monument companies, an update is needed to the language that defines standards and requirements for the foundations of monuments and markers. The new language would provide two methods for installing foundations, either of which would provide an acceptable long term base for the marker and maintain a consistent appearance within cemetery sections. Language has been developed based on input from local monument dealers and represents practices they already utilize.

• **Fees and Charges** – The final recommendation for change involves an update of the fees charged for cemetery services. Based on escalating costs incurred by the City, staff recommends increasing internment fees from $225 to $250 and disinterment from $350 to $400. The fee for funeral equipment (tent, chairs, and lowering device) would be increased from $75 to $100. That amount still compares favorably with charges applied by commercial operations.

Commissioners will recall this issue was brought forward in May of last year. At that time there was opposition raised regarding the limitations on temporary decorations. Those concerns were discussed again this year at the annual meeting of the Cemetery Advisory Board and these suggestions address some of those concerns. Based on those discussions, the recommendation for temporary decorations was revised to raise the number of decorating periods from four to five and additional days were added during the winter holiday season.

If at some point these recommendations take the form of an adopted resolution, staff would undertake steps to communicate the new regulations with the public. Prior to implementation, we would provide signage and produce media coverage to alert the community of the policy change to give individuals an opportunity to remove items on their own. At a later date cemetery staff would begin to remove remaining temporary and non-conforming items, some of which have been permanently anchored and installed. Items removed by staff would be tagged and stored for a period of time to give individuals an additional opportunity to reclaim decorations. Finally, an informational piece will be created and provided to the funeral homes to inform future internments of the rules and regulations.

Maple Grove is the final resting place of over 13,000 men, women, and children. Regulations and guidelines are necessary in order to protect the interest of all who have passed before and treat equally all who will be interred there in the future. The purpose of these suggested revisions is to put forward a functional definition of temporary decorations that provides citizens a clear understanding of the regulations and assists staff with their responsibility for maintaining the cemetery.

If there are any questions I’ll be happy to answer them or provide additional information if necessary.

From: Dan R. Williamson - Fire Chief

Date: Monday, January 8th, 2007

Subject: Re-evaluation of suspension and waiver of Ordinance No. 2838, addressing the discharge of fireworks within the city limits.

Background

Ordinance No. 2838 - Adoption of the Uniform Fire Code and all sections pertaining to the discharge of fireworks within the city limits of Dodge City

Prior to May 2003, City Code did not allow the discharge within the City Limits at any time, with the exception of publicly related events (i.e. Rodeo, Public related displays, etc.). The fireworks ban had been in effect since 1987.

Prior to 2003, the City had been approached by citizens and County officials as to the possibility of lifting the ban during a period around the 4th of July. The basis for the request came from the fact that citizens were either illegally discharging in the city limits or were going to the county areas surrounding the city to discharge fireworks. Enforcement has always been a problem and county officials indicated more of a problem existed in the county due to the city’s ban.

The City Commission on June 2, 2003 adopted Resolution No. 2003-10 which waived the current ban for a period from July 3rd to July 5th, 2003, between the hours of 10:00 a.m. To 11:00 p.m. The resolution only provides a temporary waiver to the city code, thus banning fireworks within the city limits any other day of the year.

Discussion

At issue is the 2007 reevaluation of our citywide firework's waiver. After a four year reprieve of a total ban on fireworks, the following areas of concern have arisen:

1. Increases in the total volume of fireworks discharge in neighborhood areas.
2. Increases in discarded firework debris on city streets and public access ways.
3. Life safety has become a concern with the discharging of fireworks in crowded public areas.
4. Height and control of mortar type fireworks being discharged by the public.
5. Increases in the volume of service calls/complaints to the 911 dispatch center.

In reviewing the concerns, the city has open to it, several options/solutions.

Opt. # 1. Re-enforce the total fireworks ban.
Opt. # 2. Limit firework types (ground, aerial, etc.), within the city limits.

*Each of these solutions/options pose its own set of problems.*

Opt. # 1. **  Any total fireworks ban would increase service calls to police, fire, and the 911 dispatch center.

  **  Would bring opposition from firework retailers who will be placing orders shortly for 2007.

  **  Would once again place the citizens of Dodge City out into Ford County's jurisdiction.

Opt. # 2. **  Would again require a waiver of Ordinance 2838, setting the times and types of fireworks allowed within the city limits.

  **  Would require early public notification for retailers and citizens of policy changes.

  **  Would require enforcement of policy changes. Increased service calls for police, fire, and 911 dispatch center.

  **  Should require joint action/notification to Ford County of impending changes to city codes.

Opt. # 3. **  Increased compliant/service calls to police, fire, 911 dispatch center, elected officials.

  **  Possible liabilities for failure to enforce adopted city codes.

**Recommended Actions**

Place discussion of 2007 fireworks before a city commission work session. Evaluate feedback.

CHANGE ORDER

REQUEST NUMBER: 1

PROJECT NUMBER: PK 0603

CONTRACTOR: JAG CO.

CITY OF DODGE CITY
CHANGE ORDER #1

Civic Center Parking Lot Reconstruction
PK 0603

ITEM:

DESCRIPTION:

Remove Existing Concrete Pavement – The increase of 54 SY represents actual field measurements. Additional concrete pavement on the existing north drive of the building was removed so that the transition of the new pavement would be better. An additional panel had settled, cracked, and holding water when it rained was also replaced. Additional pavement had to be removed on Morgan Blvd., plans called to remove the pavement to the toe of the new curb & gutter but 2 feet away was an existing pavement joint. It was decided to remove the pavement to this existing joint. Some pavement had to be removed because of a change in the 1st Ave. island width. The island width was increased from 3' to 5' to prevent vehicles that back into those stalls from hanging over into 1st Ave.

Remove Existing Asphalt Pavement – The increase of 296 SY represents actual field measurements. Additional asphalt pavement was removed along the north edge of the new concrete pavement to provide a transition area. This was done so that the new concrete did not have to follow the contour of the existing asphalt. There would have been numerous dips and bumps in the new pavement if we followed the existing pavement contours. Additional pavement had to be removed because of the increased width of the 1st Ave. island as explained above.

Remove Existing Curb & Gutter – The increase of 30 L.F. was due to the widening of the 1st Ave. island. This curb & gutter had already been placed when it was discovered that a vehicle would over hang 1st Ave.

Remove Existing Concrete Sidewalk – The increase of 11.65 S.Y. represents actual field measurements. A section of sidewalk had to be removed on the north side of the building because of the way it tied into the existing curb & gutter that scheduled to be removed. Some 4” concrete had to be removed because of the island redesign.

Sub-Grade Repair – The decrease of 200 C.Y. was a result of not encountering as much unsuitable sub grade as anticipated in design. The incorporation of the Fly Ash into the sub grade has help eliminate the problem of unsuitable sub grade.

7” PCC Pavement – The decrease of 2.22 S.Y. represents actual field measurements. This was the net result from the decrease of pavement by adding the new island around the light just south of the building and the extra pavement placed on Morgan Blvd, as explained in the earlier.

Place Curb & Gutter – The additional 122.56 L.F. of Curb and Gutter was necessary because of the addition of the island around the light south of the building. This island was constructed to protect the light pole. A small amount of additional curb & gutter was also needed for the 1st Ave. island redesign.

4” Concrete Sidewalk – The addition of 364.80 S.Y. was partly contributed to the addition of a transition area on the north side of the new concrete pavement as explained earlier. Staff decided to use concrete instead of asphalt because: 1) we wouldn’t have been able to get asphalt until spring. 2) It would have been cheaper than having an asphalt contractor do such a small area. Additional sidewalk was around the building, most notable on the south side. The larger island on 1st Ave. required some extra pavement.
6” Reinforced Concrete Pavement – The increase of 16 S.Y. was the net result from the drive area on each side of the building. The north drive was larger than plan and the south drive was somewhat smaller than plan. Some 6” pavement was also deleted from Morgan Blvd.

Relocate Existing electrical Fixtures – This line item was deleted because the light was actually Aquila’s property and they moved the light instead of the contractor. The power supply box had been abandoned in the past and was not replaced.

Contractor Supplied Fill – The decrease of 160 C.Y. represented what the contractor actually hauled into the new green area on the north side of the building. When the contractor level the existing yard on the south side no additional fill was needed.

Storm Inlet Box Conversion – The deletion on 1 Each was necessary because one of the existing inlets was in such disrepair that it could not be used and a new junction box was constructed.

Construct Strom Junction Box – A new junction box was constructed for the reason as mentioned above.
