Memorandum

To: Ken Strobel
   City Manager
From: Joseph E. Finley, P.E.
       Director of Engineering
Date: February 16, 2011
Subject: Property Acquisition for pipeline for Wastewater Reclamation Facility
Agenda Item: Consent Calendar

Recommendation: Approve appraisal recommendations setting fair and equitable compensation for the utility easements and temporary construction easements necessary for this project.

Background: The City needs to acquire several permanent utility easements and temporary construction easements that are necessary for the underground pipeline. As a part of the process, an appraisal is done and then review by a second appraiser. This has been completed and the City is required to set a fair and equitable compensation as outline in the Uniform Act for Property Acquisition.

Justification: Without the acquisition of these properties, the City will be unable to complete the pipeline portion of the project.

Financial Considerations: The appraisals have recommended the following offers:

<table>
<thead>
<tr>
<th>Tract 16-Brian &amp; Suzanne Shirley</th>
<th>Utility Easement</th>
<th>$8,348</th>

<td>Temporary Fencing</td>
<td>$2,640</td>
</tr>
<tr>

Purpose/Mission: The purchase of these easements will insure the completion of the project, which is necessary for the continued growth of Dodge City.

From: Paul Lewis
Date: February 17, 2011
Subject: Revised Cemetery Fees
Agenda Item: Ordinances and Resolutions

Background: Annually the Cemetery Advisory Board meets to review operations at Maple Grove Cemetery and consider revisions to rules and regulations. At this year’s meeting held in January, staff proposed revisions to the current schedule of fees and charges. After discussion, the Advisory Board adopted a motion recommending the revised fees to the City Commission.

Justification: Attached with this memo is a tabulation of cemetery fees at comparable municipal cemeteries. Dodge City last adjusted cemetery fees in 2007 and since that time we have fallen behind standard charges adopted at other cemeteries. Approval of this ordinance will keep Dodge City in line with generally accepted charges.

Financial Considerations: At current levels, fees generate around $45,000 annually and cover approximately 25% of the division’s $174,000 operating budget. The proposed fees will generate an additional $24,000 annually and offset 40% of the cost to provide that operation.

Purpose/Mission: This action is consistent with the City’s core value of Ongoing Improvement. As we continue to prepare for the City’s future, it is necessary to evaluate the services provided and charge reasonable and appropriate fees in order that available tax dollars are utilized in a responsible manner.

Legal Considerations: None

Memorandum

To: City Manager
    Assistant City Manager
    City Commissioners
From: Ray Slattery
    City Engineer
Date: February 14, 2010
Subject: 2011 Street Program
Agenda: New Business

Recommendation: Approve the 2011 Street Program as outlined on the attachment.

Background: Yearly staff outlines street construction projects for Commission approval. These projects are based on information gathered from staff maintenance records and inspection of the City Streets. A design project is also included in this year’s Street Program.

Justification: Due to the condition of some the streets listed in this year’s program, major maintenance/reconstruction projects are needed to maintain the City’s street network. The maintenance projects will extend the service life of the streets so that reconstruction projects will not be needed in the near future.

Financial Considerations: The funding for this year’s Street Program will need to come from two sources; the Special Streets Fund and General Obligation Bonds (GOB). The City’s Special Streets Fund is for construction and maintenance of the city’s streets. A total of $325,000 was budgeted and would be allocated from the Special Streets Fund for this program. The remaining funds would need to come from General Obligation Bonds. A total of $1,100,000 of funds would need to be from the GOB fund to complete the program as presented.

If $1,100,000 in bonds were issued with an interest rate of 4.0%, 10 year maturity, the annual payment would be approximately $134,000. This would represent a little over one mill. This would be in addition to the existing mill levy of the City.
**Purpose/Mission:** This Project meets the City’s Core Value of providing Ongoing Improvements for the citizens of the community.

**Legal Considerations:** N/A

**Attachments:** List of 2011 Street Projects
2011 Street Program List & Funding Source

W. Division St. Asphalt Street Reconstruction - $550,000 GOB
This project consists of reconstructing W. Division St. from 14th Ave. to Wright Ave. The process used is removing the existing asphalt pavement and replacing with 6” of new asphalt pavement over paving fabric and a treated sub-grade. Some curb and gutter will be replaced, if needed, but a majority of the curb and gutter will remain.

6th Ave. Mill & Overlay – $150,000 GOB
This project consists of performing a 2” mill and overlay from Comanche St. to Soule St. The contractor will mill 2” of the existing asphalt pavement, place a paving fabric, and place a 2” asphalt overlay to the roadway.

Central Ave. Mill & Overlay – $40,000 SS
This project consists of performing a 2” mill and overlay from end of the concrete pavement to US 50. The contractor will mill 2” of the existing asphalt pavement, place a paving fabric, and place a 2” asphalt overlay to the roadway.

San Jose Dr. Mill & Overlay – $25,000 SS
This project consists of performing a 2” mill and overlay from Central Ave. to Ave. A. The contractor will mill 2” of the existing asphalt pavement, place a paving fabric, and place a 2” asphalt overlay to the roadway.

Beeson Rd. Mill & Overlay – $95,000 SS
This project consists of performing a 2” mill and overlay from 14th Ave. to approximately Kelly Ave. The contractor will mill 2” of the existing asphalt pavement, place a paving fabric, and place a 2” asphalt overlay to the roadway.

W. Wyatt Earp Blvd. R/W Fill-In – $70,000 SS
This project consists of placing one of the following: brick pavers, colored concrete or some other “filler” in the area in between the sidewalk and the curbs installed along the business parking lots. The area ranges in width from 3’ to 1’. Staff will determine the most economical and attractive way to complete this project. Placing pavers in the island at the 14th Ave. Intersection is also included in this project.

Concrete Street Repairs $50,000 SS
This money will be allocated for repair work for Soule St. near Post Ave.

Ave. A Curb & Gutter – $10,000 SS
As part of the Gunsmoke Subdivision improvements, Ave. A along the development will have curb & gutter installed. The City has agreed to pay for this cost.

Sidewalk Construction/Repairs – $25,000 SS
This money would be divided between the Cost Share Program and sidewalk construction projects.
Trail St. Reconstruction Design Phase I — $400,000 GOB
Again this is fairly self explanatory; costs associated with hiring a consultant to design the plans for reconstructing Trail St. from 2nd Ave. to 14th Ave. With completed plans staff would try to secure help in funding the reconstruction project.

Funding Sources:
GOB (General Obligation Bonds) = $1,100,000
SS (Special Streets) = $315,000

Subject: Mariah Hills Clubhouse Renovations

Agenda Item: New Business

Recommendation: Staff requests authority to proceed with renovations to the Mariah Hills Clubhouse basement in accordance with the plan presented and at a cost not to exceed $75,373.

Background: The opening of the restaurant at Mariah Hills Clubhouse implied pro shop operations would move to the lower level. To appropriately accommodate those functions and retain public space requires remodeling of that space.

Over the last few months staff engaged the services of an architect to provide construction documents for that remodeling. As part of this process, plans were presented to the Golf Course Advisory Board for their review and input.

A final plan was developed and agreed upon and staff has obtained quotes for subcontract work and developed a construction budget. If approved by the Commission, work will start immediately by our Building Maintenance staff supported by subcontractors for specialized trades.

Justification: This project provides office space and a workroom for the golf pro, defines a controlled retail area for pro shop operations, and maintains a multi-use space to serve golf events, business meetings, and other private functions. The multi-use space is an important component of the design and this area has been well utilized in the past. Although downsized with this remodel, this 1,200 s.f. area will be attractive to the public and private entities and will allow us to generate rental income and sponsorship dollars for the operation. The proposed design further enhances that ability. This concept allows the multi-use space to be isolated from the retail area so it can be used during times it’s not required for daily golf activities and at other times when the pro shop might normally be closed.

Financial Considerations: An initial estimate for this work was $30,000 but that cost was developed without the benefit of actual plans or designs. This final design incorporates features that caused the cost to go up, including an air lock entry way and an upgrade to the flooring materials that will wear longer and be easier to maintain.

If necessary, the project can be value engineered to reduce the total cost. The air lock is a feature that can be constructed later and will reduce the initial construction cost by $12,000. Utilizing standard commercial grade carpet can save an additional $5,000.
Funds are available for this project utilizing revenue produced from the restaurant lease in the upper level which will generate annual income of $45,000. The project will be funded from the building fund with lease revenue designated to repay the fund until all costs are met.

**Purpose/Mission:** This project is consistent with the City’s core value of Ongoing Improvement. The project provides new opportunities for maximizing the utilization and benefits of the Mariah Hills facility and presents enhanced prospects for making services available to the community.

**Legal Considerations:** None
